

## Transit-Oriented Development

Need help with your transit-oriented development?

ULI's long track record of advocating for smart growth and transit-oriented development provides a rich knowledge base for advisory services panels on this issue. Past panels explored transit-oriented development as a revitalization tool and recommended strategies to leverage transit investments into sustainable development in urban and suburban locations. ULI tailors each panel to match the needs of your project and works closely with you to insure that all stakeholders and viewpoints are included in the panel process.

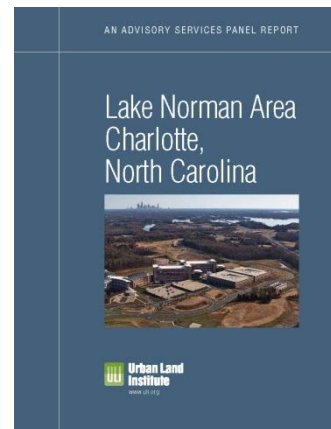

All ULI panel teams include professionals with diverse points of view—engineers, developers, planners, designers, investors, market analysts, and public officials—who work together to generate grounded, innovative solutions.

Sponsors for these panels include:

- Regional Transit Agencies
- State and Local Governments
- Community Development Corporations
- Housing Authorities

Recent panels on this topic include:

Lake Norman, North Carolina  
Phoenix, Arizona  
Minneapolis, Minnesota  
Oak Creek, Wisconsin  
Springfield, Virginia  
Utrecht, The Netherlands  
Littleton, Colorado  
Los Angeles, California  
Secaucus, New Jersey  
Denver, Colorado

The towns of Cornilium, Huntersville, Davidson and Mooresville asked a panel to provide development strategies for transit oriented development around a new, heavy rail line in suburban Charlotte.
