

Transportation

Struggling to create a balanced transportation system? Need new ideas about funding, jurisdictional cooperation and mobility?

ULI leads the industry on best practices in smart growth and sustainable land use. Panels listen to diverse viewpoints on transportation issues and recommend strategic next steps. Recent panels explored transit-oriented development strategies, regional highway planning and investment, and parking management. All panel recommendations build on the panelists' professional experiences and the Institute's collective knowledge base.

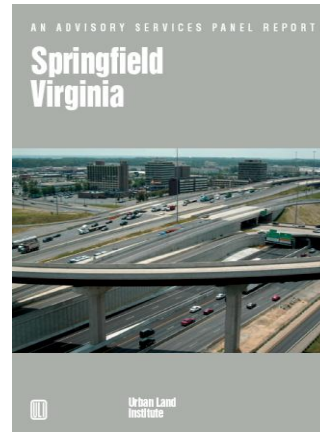

All ULI panel teams include professionals with diverse points of view—engineers, developers, planners, designers, investors, market analysts, and public officials—who work together to generate grounded, innovative solutions.

Sponsors for these panels include:

- State Departments of Transportation
- Local Governments
- Regional Highway Districts/Authorities
- Transit Agencies

Recent panels on this topic include:

Newark, New Jersey
Dallas, Texas
Bailey's Crossroads, Virginia
Springfield, Virginia
Charlotte, North Carolina
Houston, Texas
Ada County, Idaho

Fairfax County, Virginia invited the panel to explore strategies to leverage plentiful highway and transit connections to create a more walkable development pattern in Springfield, a suburban area dominated by low-density, automobile-oriented development patterns.
