

Urban Design

Struggling to integrate urban design with development and market realities?

Effective urban design solutions enhance the performance of retail, residential, office, and other development. Design also creates a unique sense of place and a memorable experience for residents and visitors. Increasingly, selective shoppers and residents look for high quality urban design when deciding where to live, work, and shop. Panels explore urban design challenges in the context of the needs of the market, the development community, and implementation agencies. Panels help sponsors invest strategically in design to catalyze growth and enhance image.

All ULI panel teams include professionals with diverse points of view—engineers, developers, planners, designers, investors, market analysts, and public officials—who work together to generate grounded, innovative solutions.

Sponsors for these panels include:

Redevelopment Authorities
State and Local Governments
Business Improvement Districts

Recent panels on this topic include:

Charlotte, North Carolina
Bailey's Crossroads, Virginia
Washington, DC
Pittsburgh, Pennsylvania
Denver, Colorado
San Bernardino, California

The panel offered Point Park University a vision and implementation strategy to transform part of downtown Pittsburgh into a thriving academic village with a lively arts scene at the street level and diverse indoor and outdoor gathering spaces.
