

Water

The New Development
Constraint?

Water More Precious Than Oil

2/3 of the world is water.
But less than 1% is drinkable.

The Water Problem

Floods

Droughts

Sewage overflows

Aging Infrastructure

Global Warming

“Global warming is unequivocal and human activity is the main driver.”

“Global warming brings the risk of more floods, severe droughts and waterborne diseases.”

Intergovernmental Panel on
Climate Change – Feb. 2007

Panelists

- Kay Brothers – Deputy General Manager Southern Nevada Water Authority, Las Vegas, NV
